

# SN Chocolate Feed

**A blend of chocolate, pasta, cereals, crackers, cookies, breads, sugars, nuts and other foods**

## What is SN Chocolate Feed?

A blend of candy (chocolate, sugars, granolas, etc.), bakery (cereals, breads, pastries, cookies, etc.), and other food byproducts (chips, pasta, etc.) and grain by-products. A finished product that is high in energy and fat, and can act as a corn/cottonseed/molasses replacement ingredient. A consistent product that has been proven to produce excellent results in beef cattle, dairy cows, and swines.

As a byproduct of the food industry, it offers a sustainable feeding solution by upcycling otherwise wasted chocolate products into a valuable nutrient source. Cows efficiently digest Chocolate Feed, converting its energy into productive output while reducing reliance on traditional feed ingredients. Additionally, its inclusion in cattle diets can help lower feed costs while maintaining a balanced and nutritious ration.

## Key Features & Benefits

<b>Crude Protein:</b>	<b>10% (Min)</b>
<b>Crude Fat:</b>	<b>11% (Min)</b>
<b>WSC:</b>	<b>16% (Min)</b>

### Additional benefits include:

- Typically used as a replacement energy source for corn, cottonseed, or molasses in the ration. Proven to increase ADG in beef, and fat and protein levels in dairy while increasing DMI.
- Replaces Cottonseed pound for pound in the ration.

### Handling and Storage:

Flat storage is recommended. Protect from moisture.
